Art Unit: 2653

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al. (USP-5,648,948).

Itoh et al. discloses a playback device (see, for example, figures 6 and 9) comprising: reading means 71 for reading a string of uniform sized blocks; data selection means 91 for selecting one or more block headers (10, 11, 12, etc.) and determining the presence of the start of an audio unit (A1L, A2L, A3L, etc.) in the block using the block header of the block; and assembling means (91/92 or 91/93) for assembling audio units from the blocks using the block headers, and consequently assembling an audio unit (channel) from the audio packets.
